Ex3

A) O vocabulário possui 785 termos.

```
maybe
      connection
      takin
      storm
      loose
      sirens
      silence
      circuits
      dead
      cannot
      decode
      whole
      spins
      frenzy
      help
      steppin
      madhouse
      cloned
      beacons
      bullet
      hits
      bone
      spiral
      destination
      unknown
      doublecrossed
      messenger
      weighs
      heavy
guilty
      borderline
      hit
      damn
      cheated
      sharing
      build
      treasure
      promises
      reward
      trust
      each
      other
785
      therell
```

TP2 1

- B) O termo 'eileen' no documento 'ComeOnEileen.txt' possui o maior peso TF-IDF (23.872).
- C) O programa demorou um total de 0.02405 segundos para criar o vocabulario.

```
@OtavioMalta →/workspaces/ORI (main) $ /home/codespace/.python/curr
.py
Tempo para criar o vocabulário: 0.024057626724243164
```

D) O programa demorou um total de 0.2132 segundos para calcular o TFIDF da coleção inteira

```
0.0, 0.0, 0.0, 3.3219280948873626, 0.0, 0.0, 0.0, 0.0, 8.587059555375903, 6
0, 0.0, 0.0, 0.0, 8.643856189774725, 8.643856189774725, 8.643856189774725,
8.643856189774725, 8.643856189774725, 4.321928094887363, 4.321928094887363,
4.321928094887363, 4.321928094887363]
Tempo de execução para calcular o TF-IDF:
          0.21323895454406738
@OtavioMalta →/workspaces/ORI (main) $ [
